Record Output in the Butte District -Labor Peace for Five Years in Great Montana Mining Camps -83,000,000 Electric Line to Connect Butte and Helena.

TORONTO, April 5 .- A new silver field which promises to be a rival of Cobalt has been found in the New Ontario wilderness, according to Prof. W. G. Miller, Provincial Geologist, who has just returned from an exploration trip of some weeks duration. This new district is about twenty-five miles to the west of Cohalt. and extends for many miles north up the Monreal River. Excellent discoveries of bloom and smaltite were examined by the Professor. A ready there is a small camp in the vicinity of dy Evelya Lake, but the entire known area is being speedily averrun with prospectors. Another camp of growing importance is that of Elk Lake, where some good native silver has been found. The discoveries so far are not of such sensational values as those first made at Cobalt, but the rock formation is just he same, and the indications show much of the peculiarity of the older region. Prof. Miller expressed the belief that the ore around the Montreal River would probably be of a ower grade than that of Cabalt, but still of great value. Railway facilities can be quickly provided for the new region, for the Govern ment line is now within eighteen miles of Elk ske. Just as soon as the mining community gives proof that the extension is needed it will be built. A New York man, John Hammell, and a party spent almost the entire winter west of the Montreal River. They exstored some sixty-five miles of a silver ridge and staked over thirty claims. These disoveries were made where the rocks protruded above the snow. At the end of last week fully ,000 people were camped around the Montreal Hiver, and despatches from Cobalt are to the

Now that the fittgation over the great lawson property has been finally settled t is certain work will be done there this year. for many months not a rock has been turned the Lawson, which is undoubtedly one the richest mines in the camp. Its surface bewing is remarkable and hundre's of isitors were surprised at the fourteen inch em which was visible beside one of the

the total shipments of ore from the score The total shipments of ore from the score of shipping mines around Cobalt since the list of the year amount to 2.78 tons, according to the Government statements. In 1904 the camp produced only 158 tons. In 1903 the total capitalization of mining companies in the district was \$25,000. This has now reached the astounding total of \$335,515,000. A Government surveyor has begun the survey of the country around Larder Lake base and meridian lines for six mile townships of the ice on the lake. A statement has been made public regarding the carnings of the Government railway which goes through the mining country for the interest of the reaches the survey of the reaches the survey of the reaches the survey of the survey of the country around Larder Lake base and meridian lines for six mile townships of the ice on the lake. A statement has been made public regarding the earnings of the Government railway which goes through the mining country for the reaches. The value of the road's equipment is estimated at over \$600,000. It is used to the most part by the mining men.

the set is estimated at over \$600,000. It is used for the most part by the mining men.

MICESOAN.

CALUMET, April 1.—Reports from a few of the largest producers indicate that there was mite an increase in the production of the Lake Superior copper district last month, the estimated production of a few of the banes is as follows. Calumet and Heela, solono pounds of copper, Tamarack, 1,100,000 rounds. Ahmeek, 340,000 pounds Osceola, 300,000 pounds. Isle Royrie, 250,000 pounds. Mass, 250,000 rounds. The products of the other mines will not be known for a few days. There has been considerable improvement in the outlook at the Mass Consolidated mine in Ontonagon county the last few weeks. The March production was approximately 150 tons of univeral, which will average 75 per sent refined copper, and it is estimated that the net profits were close to \$15,000. Stoping has been started on the Butler lode in the new C. shaft, and the results are satisfactory. An excellent grade of stamp rock is being obtained and the production of mass and barrel copper is on set large. At the two older shafts, A and S. work is progressing without delivered to traverse the sort are end of its property, and a diamond drill will be riced in the progress.

cing in commission.
The first shipment of copper from the roperty of the Lake Copper Company, in

property of the Lake Copper Company, in bitonagon county, formerly known as the Selt mine, was nade a few days ago. It consisted of a carload of mass and barrel

The Butte miners and the smelerement Bilte, Anaconda and Great Falls have coted for labor peace in the Butte district for a period of five years. Fully 9,000 votes of the property of the content of the property of the Chokagod Island except the content of the Amalemated and other mining companies, providing for a compromise of the union will be stay, and 25 cents and other equilibrations which is a complete the dayly wages at only \$1.00. The property of the Chokagod Island except the content of the property of the Chokagod Island except the content of the property of the Chokagod Island except the content of the property of the Chokagod Island except the content of the property of the Chokagod Island except the content of the property of the Chokagod Island except the content of the property of the Chokagod Island except the content of the property of the Chokagod Island except the content of the property of the Chokagod Island except the content of the property of the Chokagod Island except the content of the property of the Chokagod Island except the content of the property of the Chokagod Island except the content of the property of the Chokagod Island except the content of the property of the Chokagod Island except the content of the property of the Chokagod Island except the content of the property of the Chokagod Island except the Chokagod Island ex 

from \$00,000 to 1,000,000 shares at \$1 per share. If the increase is authorized 100,000 shares will be issued and offered to stockholders at par, The remaining 400,000 shares will be bessed and offered to stockholders at par, The remaining 400,000 shares will be Leid in the treasury and may be used to account the contract of the Snoozer interest and an interest in the Old Glory are owned by the Coalition and Amalgamated companies, and there is yet no assurance that those companies will put their holdings into the Raven Company, such a proceeding being contrary to the well known policy of the Amalgamated. A meeting of Raven directors was held in Boston last week and C. E. Morris resigned as president and director, and the contract of the contract of the succeed him as president and the start of Brookline as director.

The Butte Copper Company, which was secretly reorganized by some of the insiders without notice to other stockholders, is still employing a small number of men and making slow progress in sinking a shaft on the Trifle claim west of the city. It is also busily engaged in selling its new stock issue in New York and Boston. The company owns interests in the two Emmet claims, and it was announced that it would soon begin operations on those properties, which are well developed, claiming to have the consent and cooperation of the Coalition company, which owns the other interests in the two claims. It is officially denied that the Coalition has given any such consent, or that it will give it. On the contrary it has refused

and cooperation of the Coalition company, which owns the other interests in the two claims. It is officially denied that the Coalition has given any such consent, or that it will give it. On the contrary it has refused to permit the Butte Copper Company people to do anything or use any of the appliances in connection with the Emmets.

The high values placed on Butte mining ground is evidenced by the proposed capitalization of the Burke and Balaklava Mining Company for \$2,500,000. The company or rather the promoters of it, have secured escrow deeds for the Burke and Ralaklava lode claims, the total area being about six acres. To justify the high capitalization the promoters say that three large veins, including the Bell-Speculator, the Edith May and the Modoc veins, strike through the Burke and Balaklava ground, giving to the latter about 2,000 feet of veins. The Burke and Balaklava are two small triangular fractions lying north of and adjoining the Modoc of the Anaconda Company. Between the two fractions and the Edith May and Speculator of the North Butte are two other small claims. There is a small shaft on one of the Iractions, but it has produced very little ore. The location of the ground is good, for many years the ground was tied up in litigation, which was recently settled, and the Catholic Bishop of Montana, a corporation, holding for the Church, became the owner by inheritance. The Burke and Balaklava Company will be incorporated under the laws of Arizona. Among the men interested in the enterprise are S. Elseman, Samuel Feiber and Max Bubel of New York; I. Freimuth of Duluth, P. H. Nelson of Hibbing, Minn.; H. W. Fisher of Duluth; B. B. Dean of Minnearoolis and W. H. McIntosh of nottineau, N. D.

Reports from the mine of the Butte and Arizona company are that a winze is being sunk on the big vein and is in ore running sunk on the big vein and is in ore running sunk on the big vein and is in ore running.

Arizona company are that a winze is being sunk on the big vein and is in ore running 12 per cent, copper. The Princeton, an adjoining property, has also struck it rich on the same vein. Both companies are making preparations for commencing shipments of ore.

ore.

The Amazon-Butte Mining Company has cut through a five foot vein of copper ulphide in the shaft at a depth of 255 feet. The ore assays 4.7 per cent. copper, with good values in gold and silver. The vein was in the shaft for some distance and then dipped through to the south. The company will crosscut at the 400 and expects to open a big vein of shipping ofe at that depth.

The Davis-Daly Estates Company is opening a good body of commercial ore in the west

drift on the 500 foot level of the Smokehouse mine. The vein contains stringers of copper glance. Manager Palmer expects to open a big body of ore within a further distance of 150 feet. The crosscut being run south from the 1,800 level of the Original mine by the Davis-Daly company is now 1,550 feet long. Several veins have been cut, but the only important one does not belong to Davis-Daly ground and the other, cut recently, is a small one and does not carry at that depth commercial ore.

The Butte Coalition company has cut a vein in the crosscut being run north from the 2,200 foot level of the Corramine. The crosscut is being driven into the Alice group of claims, owned by the Coalition, but the main Alice vein has not yet been reached. The vein cut is under the surface of the Magna Charta, one of the Alice group, and although it is of considerable extent and carries good commercial ore it is surmised that it is only a offset of free of the part of the confirmate.

Intensign county. Formerly known as the Self mine, was made a few days ago. It consisted of a carload of mass and burrel consisted of a carload of the carload of the consisted of a carload of the carload carload

the electric company. In addition, spurs will be run to Lump Julch and other nearby mining districts.

COLORADO.

mine, on Bull Hill, Cripple Creek, and will exploit a six foot body of \$10 to \$18 ore encountered at 400 feet depth. The vein is oxidized and can be cyanided with little trouble. A 50 ton mill may be erected. In another part of the mine a vein has been exposed which will yield greater values.

Cripple Creek, Leadville and all other Colorado mining camps are prospering because of industrial peace now prevailing throughout the State. Miners are at work and payrolls are large. Capital from New York, Philadelphia, Boston, Pittsburg, Chicago and St. Louis and other money centres is seeking investment. Old mines are being reopened, mills are building, railroads are being constructed and growth is everywhere noted.

B. Clark Wheeler will soon begin work on

seeking investment. Old mines are being reopened, mills are building, railroads are being constructed and growth is everywhere noted.

B. Clark Wheeler will soon begin work on the Famous tunnel, which is to penetrate Richmond hill, tap the Little Annie mine, drain the entire hill and admit of working Little Annie. Midnight, Iron and other properties at great depth.

Cripple Creek, always known as a poor man's camp, because of many poor men who actually got rich there and of the opportunity to get rich which it brought to hundreds more, is to have the only home for the poor after its plan in the world. The seven hundred acres of the W. S. Stratton estate, or a tenth of Cripple Creek, are to be sold as soon as advisable, and the money. \$6,000,000 or more, is to be turned into the Myron Stratton home for the poor—\$1,000,000 for the buildings and \$5,000,000 for endowment. The executors of the will are the trustees of the home, and they are ready to act at once. All the wealth oame out of Stratton's Independence, which yielded \$4,500,000 hefore its sale to London capitalists for \$10,000,000.

The British-American Leasing Company is shipping heavily from the Dante mine. Cripple Creek, the average value being \$50 a ton. A double compartment shaft is being sunk to connect with the Trail tunnel.

Gould and associates, leasing on the Princess Alice mine. Cripple Creek, owned by Buffaio N. Y., capitalists, have contracted with the Golden Cycle Mining and Milling Company for treatment of fifty tons of ore daily. The ore averages \$32 a ton.

The March Cripple Creek output was 48,325 tons of \$1,747,290 gross value. For the entire month several important productor would have been heavier. The average value of smelter ore, of which 10,000 tons were treated was \$80. Mill ore of the first or chlorination grade averaged \$25 to \$35, according to the mills treating it for the month. Cyanide ore averaged \$3 to \$7.50 per ton. A larger tonnage than ever was treated by this process. During April the Golden Cycle cyanide mill will treat

value.

The most important strikes of the month were in the Isabella mine in which New Yorkers are interested. The Isabella mill is yielding \$8,000 to \$10,000 profit monthly.

IN THE BLACK BILLS.

HILL CITY, April 3.—A number of deals have been made lately which will mean much to mining in this vicinity. James McNickle has sold the Crown property, situated in the Horneblende district, to eastern parties who have organized a stock company. Mr. McNickle accepted stock in the new company as part payment. This is a free milling proposition with a strong ledge which shows excellent values, and is considered one of the best prospects in the central hills. The new management will do extensive development work with a view to erecting a mill as soon as the supply of ore justifies it.

The Bullion property at Keystone is under bond to A. R. Roosevelt of New York, who is acting for Eastern parties, one of whom is said to be his cousin, President Roosevelt. This property adjoins the Holy Terror on the east and has a vein averaging a hundred feet in width and consisting of quartz, talc, schist and spar with a large percentage of iron pyrites. A tunnel has been run some 400 feet below the apex of the vein, following the foot wall for a distance of 900 feet and crosscut at intervals. Another tunnel below the apex 100 feet has been run and the two tunnels are connected by upraises. The average value of the ore, which is largely free milling, is \$6.50 a ton, although stringers have been encountered which run much higher. There is already sufficient ore blocked out to run a mill of 300 tons capacity for four years. The ore is amenable to the same trestment as the Homestake ore, which it resembles. IN THE BLACK HILLS.

vein cut is under the surface of the Magna Charta, one of the Alice group, and although it is of considerable extent and carries good commercial ore it is surmised that it is only an offshoot from the big vein. If the estimate is correct the company will likely find a big copper vein when the main Alice vein is reached.

The Butte and Bacorn Company is making energetic progress in sinking on the Calumet more than 700 feet. The company will probably connect the two shafts by crossent at a depth of 1,000 feet. Exploration work continues in the Colleen Bawn.

The taking of testimony in the damage and injunction suit brought against the Amalgamated Copper Company by a combination of farmers residing or owing property in the vicinity of the Washoe smelter at Anaconda has been concluded. The hearing was begun in January, 1906, and has continued almost uninterruptedly to the present time. The transcript of the teatimony contains about 19,500,000 words. The hearing was conducted before Master in Chancery Crane, who will make his findings of fact to Judge W. H. Hunt of the United States Court. It is not likely that a decision will be reached by Judge Hunt in a year, as the master will have to examine all the testimony before making up his findings, and the farmers about \$300,000.

Butte stockholders of the Barnes-King Development Company have received word the word both the Homestake ore, which his been burning now for nine days. Has been burning now for nine days. The beneful of the Barnes hearing wide attention is and the farmers about \$300,000. rates the sands and silmes so perfectly that the leaching process is easily accomplished, even in ten foot tanks. The surface work at the mine has begun for the summer season. About forty-five men in all are employed and conditions are good.

KEYSTONK, April 3.—The great number of different lithla bearing materials in the bills is attracting wide attention. For a time only spodumene was known to exist here, but later discoveries have shown that other lithia bearing minerals of greater value than spodumene are found in paying quantities. Considerable spodumene and amblygonite have been shipped this year to manufacturers of lithia tablets, and attention is now being turned toward lepidolite, which occurs in conjunction with tin, and apatite, which also occurs in commercial quantities.

LEAD, April 3.—The fire in the Homestake mine, which has been burning now for nine days, has been the most disastrous accident that has ever befallen the company. For the first time in the history of the mine all the men have been withdrawn from the underground workings, and both the Homestake and the Star mills are closed, all stamps having been hung up, and only the Amicus mill is running on the Lead side. This and the mills at Central and Terraville are being supplied with ore from the open cut and from the Washington Tunnel level.

As it is impossible to keep a man in the mine even to work the pumps, the mine is being kept unwatered by hoisting water in the skips from the Old Sol and the Ellison hoists. The cyanide plants are also running with a reduced tonnage. The workings are filled with carbon dioxide gas, and though there has been no loss of life, yet many men have been overcome by the gas. It is not possible for any one to remain in the mine, and neither the extent of the fire nor its exact location is yet known.

known.

WASHINGTON.

SEATTLE. April 3.—The Hidden Treasure Mining Company has placed a \$30,000 order with the Hallidie Machinery Company of Spokane for an amalgamating and concentrating plant for their Nuthow property in the Okanogan. Some large crereserves have developed. The contract calls for operation of the plant by fail.

Otis Johnson of Tacoma has paid \$10,000 for control of the Elizabeth mine in the Gold Hill district at the head of the Natchez River near Mount Rainier. The property has been developed to a depth of 600 feet and there is now about 10,000 tons of ore on the dump. A smelter will be erected this summer.

A 300 foot tunnel is being run on the Cayuse Mountain claims on the Okanogan. The properties are owned by Seattle men.

The Crescent mine on the Twist River has been bonded by the owner, Frank Craighton. The consideration is \$50,000 and continuous work on the property. Spokane mining men have the bond.

The power drill on the Mountain Sheep, a property joining the Ruby in the Similkameen, broke into an ore body recently that when crosscut proved to be 18 feet in width. Crews are drifting both ways at the present time.

One of the recent strikes is the opening of a WASHINGTON.

time.

One of the recent strikes is the opening of a four foot ledge on the west slope of Palmer Mountain. The strike was made by George Milibury, one of the oldest miners in the district, 250 feet from the portal of the tunnel on his property. ALASKA.

his property.

ALASKA.

SEATTLE, April 3.—A report from Sitka says that C. D. Laue has practically bonded every property on the Chichagoff Island except those by W. P. Mills, which have already been placed under bond to Casey and associates of Seattle. The bonds given by Mr. Lane amount to nearly \$1,000,000. A claim owned by United States Commissioner Edward de Groff was bonded for \$500,000. Bernard Hirst secured a bond of \$108,000; a claim belonging to W. P. Mills not included in the bond given to Casey was bonded for \$25,000. Dr. Wyman, formerly of Juneau, who held a claim on Chichagoff, bonded it for \$25,000. Stampeders have been busy again among the Klondike creeks, and have staked in every direction. The largest number by far are on lower Indian River, about ten miles from the mouth. W. D. McKay and others are getting a group there. Several of the gributaries in the vicinity also are being staked. Among them are Laurier, Gladstone, Rat and Aldrich. Applications have reached Dawson for ground on Childs Creek, Tenmile Creek, in the Sixtynile country, and for ground in the Clear Creek district. A. U. Palm is at the head of a number of men who are staking a group on the Klondike, above the Keenan group, above Rock Creek. Some one also has been staking on the left limit of the Yukon, below Sixteen Mile Creek.

Dr. Lambert reached Dawson early in March from the outside. He announces there that he will resume charge of his mining operations on Dominion, below Gold Run.

Mrs. S. B. Brent of El Paso and several Missouri people have sold their interests in the Mexico Mines Consolidated Company, which owns the Los Angeles group of mines in Colorado district, State of Sonora. Mrs. Brent received \$200,000 gold for her share in these properties. It is not known what was paid the Missouri people for their interests. The company will erect a fifty stamp mill at the mines.

The Quimica silver lead mine near Sultepec. State of Guerrero, is about to pass into the hands of the Consolidated Metal Company. The mine is a noted producer of rich ore. It belongs to the Groth estate.

Jesse D. Grant, son of Gen. U. S. Grant, is interested in the Malcata silver lead mine near Sultepec. This property is producing \$60,000 worth of ore per month.

The Mexican Gold-Copper Company is preparing to build a smelter at its copper mines in the Guaynopa district, State of Chihuahua. The Varones Mining Company, which is composed of Los Angeles, Cal., men. is shipping some high grade silver ore from its mine. Situated at Taxoo, State of Guerrero. The company has commenced the construction of a 60 ton mill and concentrator at its mine.

The introduction of electricity in the Guanajuato mining district has revolutionized mining there and has caused great development of the industry. There are now more than 600 stamps dropping in the district. The electrical energy which is now used by all of the principal mines is transmitted from El Duro. State of Michoacan, by the Guanajuato Light and Power Company, composed of Colorado Springs, Col., men. This power is sold at the mines at \$200 per horse-power. In order to supply the growing demand for power the company is preparing to install another hydro-electric plant and transmit an additional 4,000 horse-power to the Guanajuato district. George Wereld as the mines at \$200 per horse-power. In order to supply the growing demand for power the company is preparing to install another hydro-electric plant and transmit an addi a per rantoau district.

The Colorado Development Company has done more than 1,500 feet of development work upon its Colorado mine, situated in the Huepac district, State of Sonora. It is stated that more than 1,000 feet of this work is in

The Puerto Corral Mining Company re-cently struck a rich vein of gold in its mine situated in the Tetipac district, State of situated in the Tetipac district, State of Guerrero.

La Dicha Mining and Smelting Company is making good progress in the construction of a standard gauge railroad from its mines in the State of Guerrero to the port of Marquez, on the Pacific coast. The road will be about seventy-five miles long.

SUPERIOR IRON AWAKENING. Ore Shipments to Begin This Week -Great

Expectations and Big Preparations. . CALUMET, Mich., April 6 .- The stock pile million and Mesaba ranges loom buge and dark against the landscape. They represent the underground work of the winter. In a few days the ore will begin to move to the docks at Duluth, Two Harbors and Superior. Extensive preparations are being made for the ore movement of 1907. At the shops of the Duluth and Iron Range, the Duluth. Missabe and Northern, and the Great Northern, hundreds of men are getting the ore equipment in shape for service. The mining superintendents are getting their instructions regarding what will be expected of them at their properties in the way of tonnage, and the offi-

cials of the ore roads are reminding the makers of cars and locomotives that it is im-portant not to disappoint in making deliveries of new equipment purchased last fall for delivery this spring.
Steel ore cars are now on their way from the shops for the Missabe and the Duluth and iron Hange roads, and additional cars are being forwarded daily. Numerous new engines and ore cars for the range roads are now scattered along the lines between Pennsylvania and Duluth, en route to this city to be forwarded to the range terminals. Every year for several years past the Minnesota ore roads have ordered new equipment extensively, and still the demand keeps up, for the increase of the ore movement is heavier each

increase of the ore movement is heavier each succeeding year.

Thirty-two million tons is the estimated amount that will be forwarded from the mines of Minnesota this year and the total for the Lake region is estimated at 42,000,0000 tons. It is estimated that the iron ore industry, mining and transportation of the Lake region will this year afford employment to not less than 25,000 men.

The spring has now advanced to a point where there is little danger of the iron ore freezing in the cars or docks, and reports from Sault Ste. Marie and other Lake points east are that Interlake navigation may be

from Sault Sie. Marie and other lake points east are that interlake navigation may be expected to open about April 10. The shifting of boats and the loading of ore and other commodities in the Duluth-Superior harbor will begin the latter part of this week or first of next.

will begin the latter part of this week or first of next.

A new line of boats to deliver steel rails at the Canadian head of the lakes is announced. The Dominion I ron and Steel Company, as well as other large concerns, have ordered three steamers of 3,000 tons each. The steamers will deliver steel rails from Sydney to Port Arthur and will depend upon wheat and other grain for return cargoes. The boats are to be named Cygns. Ellen and Felic, and will be of the cantilever type.

The eastern Mesaba range is commanding more and more attention and is constantly coming into greater importance. It is showing numerous small mines. While the tonnage is limited, the quality of the ore is in most cases high.

nage is limited, the quality of the ore is in most cases high.

The Mayas mine became a shipper last year and the historic old Mailman will enter the shipping list this year. The eastern Mesaba received early attention from the explorers, but the much bigger finds that started at the grass roots over toward where Hibbing and Mountain Iron villages are caused a rush in that direction and the eastern Mesaba was neglected for years. A. M. Miller, Jr., A. B. Coates, G. A. St. Clair and their respective associates have been successful in their exploration on the eastern Mesaba and they are still active in their quest of the mineral. The eastern and the western ends of the Mesaba are to-day the active districts of the range as far as exploratory work is concerned.

LIFE SAVERS FOR THE PASSAIC. Corps Will Guard the River's Dangerous

Stretch in the Summer Time. Acting Commodore Daniel Donahue of the United States Volunteer Life Saving Corps completed the enrollment of a new division yesterday afternoon to patrol the Passaic River from Little Falls to Pompton, N. J., in the summer months. Headquarters will be at Singac. Many deaths from drowning have occurred in the river and many narrow escapes have been re-corded. Five persons met death from drowning between the falls and Pompton last summer. A short distance above Singac there are rapids in the river and inexperienced cancelsts have often been drawn into them.

The new division consists of twenty

The new division consists of twenty men who have enlisted for two years as required by the corps. A building for headquarters will be erected at the Eris Railroad bridge at Singac. A lifeboat will be provided, together with cannon for shooting lines to boats in distress.
